---

### Position Overview:

The Clerk's Office for the U.S. District Court, District of Nevada, has an immediate opening for a Software Developer. This is a full-time position with benefits including annual and sick leave, health and life insurance, employee-paid disability, dental, vision, and long-term care insurance, pre-tax Flexible Spending Accounts, and retirement. This will be a temporary appointment of approximately 2+years.

The candidate will be responsible for analyzing business requirements, designing software solutions, writing programming code, maintaining code versioning and documentation, and training of system operators. This position requires a comprehensive understanding of the .NET Framework and its features. Experience with C# programming language, Web Services, and Web Applications is mandatory. Experience with Database development is highly desirable. Duties may require working during non-business hours. This position reports directly to the Director of Special Projects.

### Representative Duties:

Design, develop, implement, and test software based on a multi-tier architecture which offers industrial robustness features including high scalability, load balancing, fault tolerance, and security; applied to Web and local environments. Apply .Net technology to

solve identified problems and build efficiencies emerging from work with court employees. Perform general setup and administration of web server software such as IIS. Design, model, develop, and maintain new and existing relational databases, such as SQL Server and Informix. Incumbent will ensure that training plans are established, coordinated, and executed for all new systems. Must be able to adhere to all human resources policies and the Code of Conduct for Judicial Employees. All other duties as assigned.

#### Qualifications:

To be considered for this position, candidates should have a minimum of two years of specialized experience, including at least one year equivalent to work at the CL-28 level. Three or more years of specialized experience in the area of Information Technology is preferred. A bachelor's degree from an accredited college or university in computer science, information systems, or related field is also preferred.

Specialized experience is progressively responsible experience that is in, or closely related to, the work of a Software Developer and that has provided the particular knowledge, skills and abilities to successfully perform the duties of the position. For the Software Developer, progressively responsible experience is designing, implementing and/or maintaining software programs, including the completion of project assignments involving programming, systems integration, and information technology project management.

The successful candidate will have creativity and initiative in identifying new products and solutions, and the proven ability to quickly learn and implement new technologies; thorough working knowledge for initiating, implementing, integrating and managing computer hardware, software, databases, and data communication that is sophisticated in nature and will serve a large user base. The candidate must have the ability to work independently on assignments with minimal supervision. In addition, the person should possess the ability to both create and clearly articulate the optimal design to meet the project objectives. Must also have extensive programming experience using .Net, C#, WCF, WPF, JavaScript, and web technologies including the conversion of outdated applications to more robust and scalable client/server/multi-tiered applications. Skill is needed to train non-automation personnel in basic computer programs, AO created programs, and specially created in-house programs. Technical knowledge and experience in: Imaging manipulation, Adobe PDF, security, Internet/Intranet development, Relational Databases, Data Modeling, Software Development Methodologies, and UML. Skills in database design, data modeling, stored procedures, normalization, etc. in relational databases such as MS SQL Server and Informix. Experience in all phases of product development lifecycle is required. Ability to install, configures, and utilizes multiple operating systems including Windows and Linux.

Must be self-motivated, energetic, innovative, problem solver, detail oriented, passionate about technology, a strong technical background with a positive attitude, and must work well under pressure. Must have good oral and written communication and analytical skills.

To Apply:

Please submit a detailed resume and cover letter to:

United States District Court  
333 Las Vegas Blvd. South, Room 1334  
Las Vegas, NV 89101  
Attn: Human Resources

The U.S. District Court for the District of Nevada is an Equal Opportunity Employer. Employees of the Court are excepted service appointments and considered at-will with no coverage by federal civil service classifications or regulations and can be terminated with or without cause. All judiciary employees are required to adhere to the Judicial Code of Conduct. Applicants must be U.S. citizens or eligible to work in the United States. New employees are subject to a background check including fingerprinting and employment will be considered provisional until the background check is complete. This position requires mandatory electronic fund transfer for payment of net pay. Participation in the interview process will be at the applicants own expense and relocation expenses will not be provided. The Court reserves the right to modify the conditions of this job announcement or to withdraw the announcement without other notice.
